

SEMINARIO DI GEOMETRIA

7 Marzo 2013, h.15.30-16.30

Dipartimento di Matematica, Università di Torino,
via Carlo Alberto 10
AULA C

Eduardo Esteves

(IMPA)

Limit linear series: new perspectives.

I will explain how the notion of limit linear series was refined by work of Osserman's, the connection of those series with the Abel maps introduced by Caporaso and myself, and will browse through recent work by Nigro, Rizzo and myself that leads to a further refinement of that notion.
